27<sup>th</sup> February 2019

Dear Parents/Carers,

Online safety is an important part of keeping children safe at Featherstone Academy.

### **NEWSFLASH – PLEASE BE VIGILANT**

It has come to our attention that a number of our children, including some of our young children, have been watching YouTube clips/videos called “Five Nights at Freddy’s” and some of our children have become very scared, especially when other children have talked about these clips during break times in school.

These clips are related to a series of video games by the same name. The games are rated as 12+ years but has been recently been criticised in the news as being rated too low, a view we very much share.

Despite the age rating of 12+ years of age, the merchandise/toys currently on sale to promote these games are clearly aimed at much younger children. These toys may prompt your child to become interested and look for clips.

Please be vigilant if your child is able to access YouTube independently – even very innocent search words can produce some very inappropriate footage, even Peppa Pig”

Please take the time to look on the school website where you will find useful tips and links to support you in protecting your children online. It is vital that we fully understand the capabilities and make informed decisions about new games, apps and devices, before allowing our children to use them.

Yours sincerely,

Mrs Jackson  
Deputy Head

## Online Safety at Featherstone Academy

All of our pupils are taught how to stay safe and behave appropriately online, but this approach is only successful if we work together and reinforce safe behaviour at home too.

Many children use electronic devices or games, so we feel that it is important to highlight some simple online safety tips to help parents/carers make safer choices and support their children online.

### **Make informed choices:**

In order to protect children online, it is vital that we fully understand the capabilities and make informed decisions about new games, apps and devices, before providing them to children.

- Do your research before purchasing a new device or game for your child; find out what other parents think, search for parental advice online and ask the shop about pre-installed apps or tools.
- Always check the PEGI age rating and descriptors on games before buying them for your child and carefully consider whether the content is appropriate for them.
- Take time to find out whether the device or game has an online component or allows your child to access to the internet, which allows them to connect with others online.
- Familiarise yourself with the privacy, safety and security tools on new devices; ensure you are in a position to teach your child how to make their accounts private and how to block and report other people online.

Use the parent guides and shopper's checklists from UK Safer Internet Centre to help you ask the right questions and make informed choices when buying new technology: <https://www.saferinternet.org.uk/advice-centre/parents-and-carers/parents-guide-technology>

### **Setting boundaries:**

Much like the 'real world', parents need to set boundaries for children online; this provides them with a clear understanding of the limits, expectations and consequences of their behaviour.

- Discuss and agree as a family, how the internet and technology will be used in your home: consider nominating 'tech-free' areas or times, such as: your child's bedroom or dinner time.
- Discuss online boundaries too; let children use the lessons they learn in school to tell you what they think is/isn't acceptable for them to do online and adapt these messages into your own family rules.

Take a look at the conversation starter ideas and family agreement template available from Childnet International: <https://www.childnet.com/parents-and-carers/have-a-conversation>

## **Filters and Parental Controls:**

Children can accidentally or deliberately be exposed to illegal, unwanted or unpleasant content online, but there are some simple steps you can take at home to help minimise this risk.

- Make sure you install anti-virus software, filters and parental controls on your child's device before giving it to them.
- Ensure that you are role-modelling good behaviour by using strong passwords yourself; make them difficult to guess and don't share them with your children.
- Remember that blocks and filters are not 100% effective and you can't rely on them alone to protect your children, so remind them to tell you if they see something upsetting online.

Take a look at the interactive guide to parental controls available from Internet Matters:

<https://www.internetmatters.org/parental-controls/>

## **Talk to your children:**

Take an active interest in your child's online life and engage in the digital world with them.

- Let your children teach you about their online world and how they use technology; playing new games and exploring websites together can often open opportunities to discuss safe behaviour online.
- Make sure your children know that you are safe and approachable; remind them that they can tell you if something happens online that makes them feel scared, worried or uncomfortable, without being told off or punished.

You can find more advice about talking to your child about online safety from CEOP: <https://www.thinkuknow.co.uk/parents/articles/having-a-conversation-with-your-child/>

Other useful websites for parents can be found on our website.

If you would like further support and advice regarding online safety, please contact the school.
